

# SHD APP CONTROLS CARWASH

## Vending & Settings Carwash plant

APP - CONTROLS P - General Purpose Automation  
www.shd-elettronica.it info@shd-elettronica.it

SHD - CUSTOM APP

### Functional Characteristics:

We propose you an automation of new generation:

→ The control of CarWash plants by APP (IOS Apple & Android).

The system is composed by an electronics (SHD Electronic Board) and a customizable Application that allows you to put in communication a Tablet or Smartphone with your CarWash plant.

#### Some possible applications:

##### **Control Panel / Setting Plant :**

Downloaded and started the application on your own device, it will enter in communication with the PLC and allows you to visualize and parameterize the settings and the state of the plant.

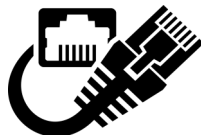

##### **Sales related Applications:**

Downloaded and started the application on your own device, the client will be able to interact with the plant using the Smartphone/Tablet as a payment system interface.

#### Advantages:

The proposed system provides the following main features:

- **Simple** and easy to use **solutions**, based on devices of daily use: Smartphones & Tablets
- **Innovative solutions**: based on simplicity, they use devices that enable connectivity to main resources of the system through Wi-Fi, UMTS/ GPRS, Bluetooth, custom connections
- **Economic Solutions** using the TOP of technology: exploiting devices as Tablet and Smartphone in commerce

CAR WASH POWER SENSOR  
Sensibility makes the difference.
